

Priority Area 3	Assistance for the Human Security of Vulnerable People and Social Development											
	<p>[Background and current situation] The standard of living of most Zimbabweans has been deteriorating due to the political and economic instability experienced since 2000, as well as natural disasters such as droughts and cyclones that have occurred frequently in recent years. Many people are experiencing a dire situation in terms of accessing adequate healthcare, education and food security. In addition, women do not enjoy equal rights, with their safety, education and health often at risk. In order to achieve sustainable development, a healthy and equal society needs to be realised where all vulnerable people can enjoy the same economic and social benefits without being left behind.</p>			<p>[Strategy] Strengthen food assistance to deal with serious food shortages. Support the improvement of access to safe water and sanitation. Medium- to long-term strengthening of health services and systems through the development of human resources and provision of equipment. Support the improvement of access to adequate education and gender equality through the promotion of human resources and construction of facilities. Continued support for the removal of landmines, which pose a major threat to the lives of local residents. The above initiatives are expected to contribute to the achievement of SDGs 3 (health for all), 4 (quality education), 6 (clean water and sanitation), 11 (sustainable cities and communities), 13 (climate action) and 16 (peace, justice and strong institutions).</p>								
	Japan's Assistance Program	Program Summary	Project	Scheme	Schedule						Assistance Amount (100 Million Yen)	Note
